

How to get started with the Yahoo! Module

The Yahoo Module for ReadyShipper is designed to get the most out of your Yahoo! Store. It delivers a simplified shipping process through one powerful solution for all your UPS, FedEx and USPS shipments.

Easily import your orders automatically or on demand, the Yahoo! module supports the way you work with great flexibility. This is a complete shipping integration that will assist you in quickly organizing and shipping your orders and delivers the features to post the shipping and tracking information back to your Yahoo! Store.

This Module is compatible will all versions of Yahoo! Merchant that support the API integration. The following pages will walk you through the standard set-up.

To get started:

- You must have be an active Yahoo! Store with access to Admin Panel.
- ReadyShipper 6.5.4 or greater installed and running on your PC or Mac.
- The Yahoo! Module for ReadyShipper must be downloaded to your desktop.

The first step is to set-up the authorize ReadyShipper for use with your Yahoo! Store.

• Select "Add New Partner".

• Enter TrueShip Partner ID below exactly as shown:

ypa-002633114459

• Click "Next".

API Settings Screen

Once the partner ID has been added, a partner access token will be generated and sent to you by email. You need to enter this Partner Access Token field in ReadyShipper's Yahoo! Module Settings screen.

If you have not done so already, download the Yahoo! Module from TrueShip.com. Save it to your desktop. It will look like a puzzle piece.

Double click on the puzzle piece to install the module and continue set-up. The Yahoo! Module will ensure all remaining connections.

Once the Yahoo! module is installed in ReadyShipper go to : **Modules > Yahoo! > Settings**

00	🔿 🔿 🛛 Yahoo! Small Business Merchant Store Settings
